STATIC SOLUTION

Fan type

Mount on cell workbench, parts stock shelf, or belt conveyer. Switch the fan speed for neutralization in the close or far distance.

Nozzle type

Assemble into manufacturing devices for pinpoint neutralization and dust-elimination within cramped spaces. Just replace the nozzle to use for various applications (N-1, N-3)

Gun type

Ideal for air cleaning and neutralization of parts after having received and before assembling them. Also good for resin molded parts before painting them.

Bar type

Suitable for neutralization in clean rooms, and for prevention of static electricity on films moving at high speeds.

Ion Parts Cleaner

Air cleaning in non-static area. Scattered dust is collected by a dust collector. Our Ion Parts Cleaner maintains the clean environment.

EPA Working Mat

ESD control mats for use in areas where parts are handled, assembled, repaired and tested.
